

CONFESES HE WAS ACCOMPLICE IN CAUSING DEATH OF GIRL

(By Associated Press.)

OLNEY, Ill., Jan. 9.—Roy Hinderlter, on trial for the murder of Elizabeth Ratcliffe, his sweetheart, confessed on the witness stand that the girl's death occurred during an attempt at an illegal operation, while out riding with him, but asserted that the girl had used instruments supplied by him while he was not with her.

The youthful defendant sobbed as he told of the fatal try in an orchard and repeatedly said that the girl had urged him to aid her. He said that if her death were due to the presence of an air bubble in the veins the air might have been due

to the use of an atomizer with which he provided her at the suggestion of a friend. Hinderlter said that he and Glenn Jones came to Olney on July 21 in response to a letter from Elizabeth Ratcliffe, who wrote that she would kill herself unless he aided her. He took her for a ride that night. They drove about the city for an hour and then went south until they came to an orchard.

There the girl asked him to prevent the discovery of her alliance with him and he told her that he had some things in the biggy with which she might relieve her condition. The girl, he said, employed these articles as he had directed, while he went to unhook his team.

ROMANCE OF DESERT ENDS WITH WEALTH

LOUIS CIRAC DRIVES AN AUTO;
USED TO MINE AND KILL
JACKRABBITS

Louis Cirac is now riding around in a 1917 model auto, which, so far as the auto goes, lots of other people are doing the same things, which practically spells nothing, writes J.

DELINQUENT SALE NOTICE

TONOPAH GIPSY QUEEN MINING COMPANY

Location of principal place of business and location of works: Tonopah, Nye County, Nevada.

NOTICE—There are delinquent upon the following described stock, on account of assessment No. 10, levied on the 13th day of November, 1916, the several amounts set opposite the names of the respective shareholders, as follows:

HORACE MARDEN, NEVADAN, DIES IN SAN FRANCISCO

Died, in San Francisco, December 30, 1916, Horace Marden, a native of Maine, aged 84 years 6 months and 7 days.

In that brief paragraph is recorded the passing of a man of high repute throughout his long years of manhood; one who was actively connected with large affairs, and the friend and oft-times the confidant and adviser of captains of industry in the pioneer days of California and Nevada.

More or less of that activity is hinted at in the articles signed H. M. which have been published in this paper, says the Inyo County Register, and of which two or three are yet to be printed. In those articles, appearing in the "Outposts of Civilization" department, some of the early history of Aurora, Bridgeport, Columbus and Bodie have been told, forming an authentic record of the details of which they treat. Others would probably have followed had not death stilled his pen, for in those camps, and before them in Tuolumne county, he participated in the current life and took a pleasure in noting his recollections, and more recently responding to the editor's urging that such matters should be set down while it was a possibility.

Mr. Marden was prominent in the affairs of the different communities in which he resided, and was a member of the Nevada legislature.

FORMER TONOPAH TEACHER ANNOUNCES HIS ENGAGEMENT

At a dinner given in the Union League club of San Francisco last month, announcement was made of the engagement of Prof. Schoer, formerly of the Tonopah high school, to Miss Isabelle Rodgers, lately of Elko, Nevada. The bride-to-be is a resident of Berkeley, where she is attending the university, and the engagement is the result of an old attachment dating back to the time when the pair were boy and girl in Elko. Prof. Schoer is now one of the faculty of the Ukiah, Cal., high school and will continue to make his home in that town.

Dirty Windows.
A German professor has ascertained that in industrial cities windows which have not been washed for ten days exclude from 35 to 48 per cent of the light. If not washed for four weeks they may exclude as much as 80 per cent of the light.

Music is a valuable aid in surgery, says a Chicago surgeon, but it doesn't dispense with the need of an anesthetic.

A HOME WELL FOUNDED
A home where happiness is based securely on health and good physical condition, a home where the home keeper devotes her most intelligent efforts to her daily bill of fare, WHOLESOME bread, daily baked in a modern brick oven, good bread, served on your table every day, does more to lay the foundation of bodily vigor and endurance than any other food you can provide.

The highest authorities agree on this. Keep a supply of this satisfying bread in your pantry and insist upon your grocer getting it from

A 6-12 issue of more than usual interest in the Vanderbilt Cup Race, Santa Monica, Cal., Nov. 16th, was the battle of The Tires. Both Goodrich and Goodyear were out to win, and much emphasis was placed upon the standing of the contestants in the championship table. While Aitken in the early stages of the race was leading, it looked very much as if Goodyear would score; but Resta, who was the backbone of the Goodrich offense, soon made his presence felt, and when he assumed the lead there was much animation apparent in the Goodrich camp. Later, when it developed that the four leading cars were equipped with Goodrich Tires, telegrams were flashed to every section of the country announcing the victory, which again places the Goodrich in the van for 1916 championship honor. Every car that finished carried Bosch equipment, the majority of them having Bosch spark plugs in addition to magnitos of the same make.

We carry Silvertown Cord Tires and Bosch magnetos in stock.

AERONAUTICS IN WARFARE.

Why Napoleon Did Not Favor the Use of Observation Balloons.

It is on record that the first employment of aerostatics to observe the positions of an enemy were made during the French revolution. It was a Dr. Coutelle who produced hydrogen gas from the decomposition of water. He had been interdicted the employment of sulphuric acid in this preparation, as there was a lack of sulphur for the making of gunpowder.

Dr. Coutelle was ordered to put himself at the disposal of General Jour-

dan, who commanded the army of the Sambre and Meuse. On presenting himself to Duquesnoy, a commissioner of the convention, that dignitary rose in wrath, exclaiming: "A balloon, a balloon in the camp! You look to me like a suspect. I am going to begin by having you shot!"

Coutelle returned to Paris, and his balloons were afterward put to use at Bonn, at Coblenz and at Andernach. At the last named place General Bernadotte, the ancestor of the present reigning house of Sweden, was invited to go up in a balloon. "No," responded that careful man, "I prefer the road of the asses."

There was a school of aerostation at Meudon, which Bonaparte closed after his return from Egypt. As nothing could prevent other nations from using like air fliers, the balloons, he claimed, might become an embarrassment to all the armies, without any special advantage to the French army. —*Cri de Paris.*

What Did She Mean?
Saleswoman (to purchaser of widow's bonnet)—Would you like to try it on before the glass, madam? Customer—No, thank you, miss. It ain't for me. I wish it was.—*Stray Stories.*

Lookout housewives! "Big and Cheap" does not mean Big Quality at little cost. These two things do not go together.

It does mean Big Quantity—Little Quality.

This is true of everything you buy—everything you eat and wear.

And it is especially true of baking powder.

When a "big and cheap" can of baking powder is offered you—one that sells for less than 25 cents a pound—**LOOK-OUT.**

Such powders are lacking in something—perhaps in many things. They cannot always be dependable; they cannot always run uniform.

Such baking powders cannot be made of the best materials. They do not always produce the proper amount of leavening gas—in such cases considerable more is required for results.

They sometimes leave the baking bleached and acid, yellow and alkaline; and sometimes the food is unpalatable—flat, soggy or indigestible.

Just observe the difference between a biscuit made with the "big and cheap" powder and that made with a good powder.

It's the same old story over again! "Cheap goods are expensive. Expensive goods are extravagant." Moderation is the best policy.

CALUMET is THE Moderate Priced Baking Powder.

It costs a little more than cheap and big can kinds but it's worth twice as much.

Better and purer materials cannot be put into a baking powder at any price. More careful methods of preparing do not exist.

Calumet is used and recommended by the best domestic science teachers and food experts. It is also used by the best cooks and recommended by leading physicians and chemists.

President Wilson's Christmas cake was baked with Calumet Baking Powder. Another recommendation.

Ask your dealer for **CALUMET**—Demand it—Get it. And whatever you do, avoid the cheap and Big Can Kind.

Received Highest Awards World's Pure Food Exposition, Chicago, Paris Exposition, France, March, 1912.
